Work Experience

Company : Asumnrealty
Role : Mern Stack Developer
Project Name : Living Square (<https://www.ausumnrealty.com>)
Responsibilities :

- Developed responsive and interactive UI components using React.js and modern JavaScript (ES6+).
- Integrated backend APIs using Axios, handling request interceptors, error handling, and optimized data fetching.
- Managed global application state using Redux, including actions, reducers, middleware, and store configuration.
- Implemented secure authentication and protected routes by integrating frontend logic with backend Passport.js strategies.
- Collaborated with backend and design teams to deliver scalable features, improve performance, and ensure seamless user experience across devices.

Company : HashInclude.io
Role : Web Developer Intern

Responsibilities :

- Mar 2024 – Jun 2024 (4 Months)
- Worked on frontend development using React.js and JavaScript (ES6+)
- Built reusable UI components and improved existing screens
- Integrated REST APIs and handled dynamic data rendering
- Fixed UI bugs and improved responsiveness across devices
- Collaborated using Git and followed team development workflows

Projects

- **E-Commerce Website**

Company Project | Ausumnrealty (Internal)

- Internal e-commerce system for managing products and orders
- Developed product listings, cart flow, and order management
- Built admin dashboards for inventory and order tracking
- Tech Stack: React.js, Node.js, Express.js, MongoDB

- **Living Square – Real Estate Platform**

Company Project | Ausumnrealty (Production)

- Real-estate platform for browsing, filtering, and inquiring about properties
- Built responsive UI using React.js and Tailwind CSS
- Integrated REST APIs and managed state using Redux
- Worked with MongoDB-backed APIs and authentication flows
- Improved lead inquiry and filtering workflows

- **Ausumn Legal – Property Registration Platform**

Company Project | Ausumnrealty (Internal)

- Separate platform focused on property registration and related legal processes
- Enabled user registration and submission of property registration requests
- Implemented lead capture, follow-up, and client management workflows
- Built session and query handling for property-related legal cases
- Integrated service scheduling for registration and legal consultations
- Worked on frontend UI and backend API integration using React.js, Node.js, and MongoDB

- **Ausumn Walls – Property & Interior Services Platform**

Company Project | Ausumnrealty (Internal)

- Separate platform for property interior and wall-related services
- User registration and service inquiry submission
- Lead management and follow-up workflows for internal teams
- Session handling, query tracking, and service scheduling features
- Focused on responsive UI and API integration
